Unless you are living under rock, then you must know, that Y2K is back. Low-rise jeans have been able to transition well from spring/summer 2022 runways to fall/winter collections.

For many people this may sound alarming as they've been known to suit a slimmer body type, maybe you prefer a more modest look, or maybe you've never even given them a try. Compared to the early 2000s, today's low-rise jeans are more practical. You won't have to worry about anything showing, or maybe that was the plan all along.

Paris Hilton, a-list celebrity whom we all know, and love popularized the style when it was booming along with many others. As fashion always repeats itself, it was finally time for the Y2K revival and these iconic low-rise moments continue to remain on our Pinterest boards today. As low-rise jeans came into existence high rise was going out from the 90s, sounds familiar, right? For a while now all we've seen is high-rise and for some this will probably remain, as there is no pressure to switch but who knows? Maybe a low-rise was that refreshing and daring fashion choice you were looking for all along.

our top picks for the best low-rise jeans of 2022:
